Junior Backend Developer

I'm a motivated and detail-oriented Back-End Developer with hands-on experience building web applications using Python (Django), Database Management Systems, and JavaScript ES6+. Skilled in developing secure, efficient, and scalable back-end systems with a focus on data handling, API integration, and server-side logic. I'm currently expanding backend expertise through Python and Django. Skilled in designing RESTful APIs, handling JSON data, and building services that support AI-driven applications. Actively learning data handling, Python-based web frameworks, and exploring AI model integration.

Skills

- HTML and CSS
- JavaScript (Programming Language) ES6+
- NodeJS
- Express.js
- MongoDB
- ReactJS
- Python
- Django
- SQL Databases
- Git
- Application Programming Interfaces (APIs)
- Construction Engineering

Projects

User Authentication System

- Registration (Email/ Password, OAuth)
- JWT/ Session Management
- Password Hashing (bcrypt)
- Rate Limiting

Subscription Tracker

- JWT claims for plain access
- Optimized error handling for cleaner
- Renewal Date Tracking

Experience

1 Internship

Private Construction Firm, Accra

October 2024 — November 2024

- Assisted in developing a back-end web application with Node.js serving a REST API, Bootstrap for the front-end.
- Assisted in developing secure system logic to monitor application performance and to alert stakeholders of any potential issues
- Designed and customised user authentications for modern and secure user confidentiality.
